# Create a COVID-safe environment

Let's protect our mob

Good hygiene is necessary to help stop the spread of COVID-19.

We can look out for our mob by playing a role in creating a COVID safe environment. Ensure family and friends know how to practice good hygiene by cleaning and disinfecting homes correctly. This can help to minimise the spread of the disease.

You can create a safe environment by:

- » Following good hygiene advice
- » Cleaning and disinfecting frequently used surfaces such as benchtops, desks and doorknobs
- » Cleaning and disinfecting frequently used objects such as mobile phones, keys, wallets and work passes
- » Vacuuming carpets and mopping hard floors regularly
- » Increasing the amount of fresh air available by opening windows or adjusting air conditioning
- » Using a detergent-based product to physically clean surfaces then apply a disinfectant product or use a combination detergent and disinfectant product

What disinfectants can I use?

Disinfectants approved for use against COVID-19 include:

- » Detergent, either as a solution that can be mixed with water, or as wipes
- » A disinfectant containing alcohol (at a concentration of 70% or more)
- » A 2-in-1 detergent and disinfectant solution or wipes which can be used for routine cleaning.

Where can I buy COVID-19 approved disinfectants?

- » Your local supermarket
- » Hardware or general stores
